

Sample Candidate Score Report

All candidates receive a detailed score report. In addition to providing the candidate's overall percentage score, the percentage pass-fail cut score, and the overall pass-fail outcome, Candidates receive subscore information. An example of a candidate score report is displayed below.

=====
EMPLOYMENT SUPPORT PROFESSIONAL CERTIFICATION COUNCIL
CERTIFICATION TEST FOR EMPLOYMENT SUPPORT PROFESSIONALS

Administration Date: April 5, 2017
State/Jurisdiction: XXXXXXXX

=====

Score Report for: XXXXXXXX, XXXX

Total Score: 67%
Pass-Fail Cut Score: 70%
Pass-Fail Outcome: FAIL

Content Area Subscores*

Content Area -----	Number of Test Items -----	
	Correct -----	Scored -----
1. Core Values	10	15
2. Assessment	19	30
3. Job Development	16	27
4. Job Training	24	33
5. Ongoing Support	7	9
	-----	-----
Total	76	114

* Subscores may be useful in distinguishing the domains in which you under-performed relative to your overall score, vs. the domains in which you out-performed relative to your overall score. Please refer to the [APSE website](#) for information regarding subscore interpretation.

Interpretation of Subscores

Subscores may be useful in distinguishing the domains in which you underperformed relative to your overall score, vs. the domains in which you outperformed relative to your overall score. You can draw these conclusions by calculating your percentage score for each domain (see example below), and then comparing the domain percentage subscores to your overall percentage score.

Domain subscore = (number correct / number scored * 100)

Subscores may also be compared with the pass-fail cut score to identify domains where score gains in performance are potentially greatest for candidates who failed the test and who anticipate retaking it. Passing candidates also receive subscores as a possible aid in selecting corresponding areas of continuing education in which to focus. Regardless of one's pass-fail status, a subscore in a domain with relatively few items (e.g., Ongoing Support) is not likely to be as representative of a candidate's level of knowledge and skill as a domain with many items (e.g., Job Training).
